Fullstack Web Developer • Portfolio

Profile

Sustainability activist turned Hi-tech enthusiast. I have delved into web development and found my intellectual skills re-awakened.

A quick learner, I give great attention to details, always looking to understand the structure of the subject at hand, seldom satisfied with a superficial "it just works" solution.

I am now pursuing a career in technological and information-driven industries, excited to bring with me my wide experience building collaborative, diverse teams.
